Health & Safety Policy

Energy Power Systems Australia (EPSA) is committed to the safety, health and wellbeing of our employees, contractors and stakeholders, including our suppliers and clients.

Our vision is of no incidents today. We envisage an incident-free workplace each day, and we work towards this vision.

Because of our structure and diversity, we actively implement and maintain the EPSA Health and Safety Policy as mandatory at all of our sites.

In particular EPSA will:

- Always put the health and safety of our employees, contractors, visitors and communities first;
- Build a safety culture that demands visible leadership and encourages no work to be undertaken unless it can be carried out safely;
- Encourage personnel to stop any unsafe acts prior to an incident occurring;
- Provide a balanced focus on the management of the health and wellbeing of personnel and process;
- Promote active participation in health and safety in ourselves and others;
- Ensure adequately trained resources to support the management of personal health and safety;
- Strive to mitigate health and safety risks through hazard identification and risk management, with continual improvement processes in place;
- Comply with all applicable laws, regulations, internal policies and contractual obligations as a minimum standard;
- Display a copy of the Health and Safety Policy in a prominent position in reception, meeting rooms and warehouse amenities of each site under EPSA control.

While all employees are directly responsible for working in a safe manner to prevent injury to themselves, fellow workers and others, we recognise the role of our collective senior management in ensuring a safe and healthy work environment.

Our management team are accountable for managing health and safety in the workplace by example and in a credible manner.

Chris Murray

Managing Director
