

A large yellow CAT industrial generator is the central focus, situated in a complex industrial environment with various pipes and machinery. The CAT logo is prominently displayed on the side of the generator. Overlaid on the right side of the image is the text "GOT A JOB TO DO? WE'VE GOT THE POWER TO DO IT." in a large, bold, white sans-serif font.

**GOT A  
JOB TO DO?  
WE'VE GOT  
THE POWER  
TO DO IT.**

**Energy Power  
Systems**

**// You can't go past EPSA if you  
want a ready supply of topnotch  
Cat® engines, convenient local  
service and the most extensive  
nationwide support. //**

— Xylem Water Solutions

# THE NUMBER ONE ENGINE SUPPLIER IN AUSTRALIA.

**Energy Power Systems Australia** (EPSA) is the exclusive supplier of Cat® engines and power solutions in Australia, Papua New Guinea and the Solomon Islands.

We deliver you technically superior Cat products with unmatched engineering support, technical advice and after-sales support through our Caterpillar dealer network of branches, stores and workshops at over 80 locations throughout Australia, PNG and the Solomon Islands.

We supply engines and generators for the broadest range of industries and applications from an off-the-shelf low-cost engine or generator to full turnkey solutions including project management and commissioning.

We have a national fleet of rental power generators, air compressors and temperature control units.

We also sell used Cat engines and generators.

# GENUINE CAT POWER.

Since commencing business over 20 years ago, EPSA has become the industry leader in the supply of engines and generators in Australia, PNG and the Solomon Islands, and a major provider of turnkey power solutions.

**// The Cat product is what our customers want. EPSA is always on hand to assist and provide great delivery performance – it would be foolish not to use Cat! //**

- Agricultural Machinery
- Off-Highway Vehicles

#### **Used Power**

- Power Generation
- Temperature Control
- Compressed Air

# CUSTOMISED SOLUTIONS.

**“ EPSA provided us with a turnkey solution to meet the requirement for a power plant capable of exporting a full 10 MW at all times, including very hot days where temperatures exceed 40 degrees Celsius. The solution included connection to the local gas and electricity networks. ”**

— NovaPower

EPSA manages your turnkey project – from cost estimation and planning to design and scheduling through to procurement, installation and commissioning. We'll deal with statutory approval bodies, subcontractors and suppliers. We'll deliver to you ready to run.

### **Design and Engineering**

- Feasibility and Concept Design
- Load Analysis
- Engine Sizing/Selection
- Noise Modelling
- Earthing and Protection Studies
- Utility Approvals and Permits
- Environmental and Emissions Modelling
- Construction Approvals
- Mechanical and Electrical Design
- Systems Integration
- Whole-of-life Costing

### **Project Management and Construction**

- Turnkey Project and Site Management
- HS&E Documentation and Management
- Quality System Documentation and Management
- Risk Assessment and Management
- Subcontractor Management
- Procurement
- Off-site Fabrication
- Customised Project-specific Manuals and Documentation

### **Testing**

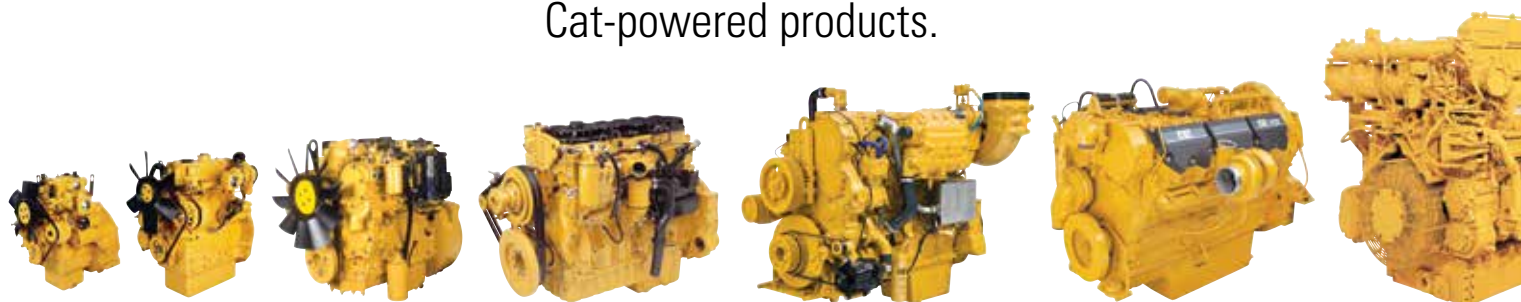

- Factory Acceptance Testing
- On-site Testing
- Surveys
- Control and Monitoring System Testing

### **Installation and Commissioning**

- Integrated Site Installation and Construction
- Construction Supervision
- Specialist Engine and Generator Technicians
- Installation of Electrical and Balance of Plant Systems
- Fuel System Installation
- Exhaust System Installation
- Specialist On-site Services

# RANGE AND QUALITY

Energy Power Systems Australia offers our customers an extensive breadth of branches and facilities, an unmatched support footprint, excellent staff and, of course, Cat-powered products.

# SUPPORT NETWORK

# CATERPILLAR: GUARANTEED ONGOING DEPENDABILITY, RELIABILITY AND EFFICIENCY.

National coverage – quick response and quick delivery anywhere in Australia, Papua New Guinea and the Solomon Islands.
